urday night visited police headquarters and underwent a rigid system of measurements, with the result that the latter discovered he is a marvel in more ways than one. The tape developed the fact that the Cieveland man had the second largest head ever measured in St. Louis under the accurate Hertillon method. He was only surpassed in this respect by "Big Tom Laily," who goes under numerous aliases when not doing time in some one or other of the many State prisons, and who at present is serving a term in the lowa Penitentiary. Jenkins's head measurements are: Head, 20.6 inches in length; width, 16.8 inches; cheek, 16.1 inches; right ear, 8.9 inches.

Though the wrestlers are built on very different lines, the tape shows that they are almost of a size in many respects. In chest development there is only a slight margin in favor of Jenkins, while in reach he has but one inch the best of the Teuton. The measurements are given below:
